

Data InQuest

A powerful tool for reformatting files between fixed width and delimited formats

Key Features:

File reformatting between fixed and delimited formats

Reformatting capabilities for multiple files

Conversion between grid and geographical coordinates

Ideal for the global editing of fields such line names

Performs mathematical conversions

The Data InQuest application possesses a high degree of flexibility to allow the user to manipulate specific data fields or parts of data fields to be extracted from one file and output into another. These Conversion processes may be run on a single file or on multiple files and allow for user-specified conversions between any fixed width format files such as UKOOA P1, P2, SPS, SEG-P1 or text and Excel compliant .csv files.

Defining the general format type of both input and output files

Defining input and output data fields

Data InQuest is a timesaving solution to the reformatting of files in any text or industry standard fixed format.

Running a single line test conversion

Applications

- ◆ Conversion of Preplot text files into system compliant UKOOA P1/xx format files
- ◆ Extraction of data from UKOOA P2/xx, SPS, SEG-P1 format files
- ◆ Conversion of data between grid and geographical coordinates where only one coordinate type exists
- ◆ Outputting only specific data fields into new files
- ◆ Globally editing line names in data files

Features

- ◆ Runs on Notebook or desktop computers
- ◆ Intuitive software, easy to learn and useful to use
- ◆ Easy to follow tutorials
- ◆ Fast multiple file conversions
- ◆ Reliable conversions between grid and geographical coordinates

Data—System Requirements

Operating System Microsoft Windows 2000 / XP / Vista
