

TRIGGERFISH™

MULTI-FUNCTION INTEGRATED NAVIGATION SYSTEM

TRIGGERFISH™

MULTI-FUNCTION INTEGRATED NAVIGATION SYSTEM

TriggerFish™ is a scalable, real time seismic navigation and event synchronisation system for Ocean Bottom Cable, Transition Zone, 2D towed streamer, Node, EM and Life of Field geophysical surveys.

TriggerFish™ manages and controls timing sequences with the degree of accuracy required for seismic applications. It is a flexible PC based Integrated Navigation System allowing centralised control of survey parameters and operations over a distributed fleet or across the internet.

► RELIABILITY & FLEXIBILITY

- Scales from a single shooting vessel to a multiple vessel operation
- Survey planning tools for design, planning and mapping of the survey
- Smoothly interfaces with all standard seismic industry systems
- Gravel Decoder Units provide true parallel processing & precise time-stamping of sensor data
- MOB feature, logs and displays position & relays across the fleet
- Integrates with GeoMetis MX or BX for data processing and QC

■ SPECIFICATIONS

- Runs on Windows XP platform
- Runs on laptops or tablet PCs for small vessels & server machines for larger vessels
- Each input independently handled by bespoke 8 channel Gravel Decoder Units
- Inter-vessel comms via UHF or Network Radio Units

■ MULTI-FUNCTION INS

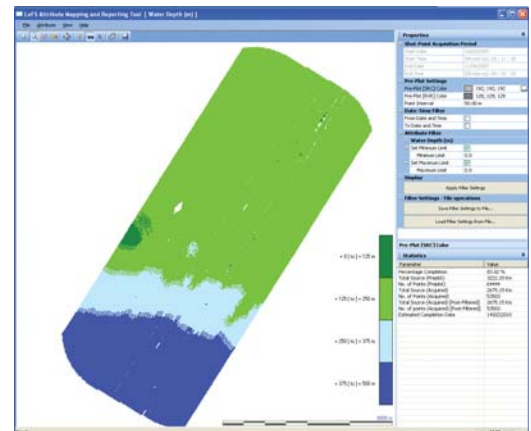

- OBC, TZ, 2D Streamer, LOFS, EM and Nodes - from single to multi-vessel operations

■ MULTI SHOOTER/RECORDER

- Inline position & speed displays; Fully autonomous buoy recorder units

■ SPS MANAGEMENT

- Dynamically generates SPS-S, X and R files online
